SUMMARY

Full-Stack Software Engineer with 5+ years of experience building scalable, production-grade web applications and APIs. Strong background in backend development, real-time systems, and cloud-native architectures using Node.js, TypeScript, Python, and AWS. Experienced in designing end-to-end systems, optimizing performance, and collaborating in cross-functional teams.

EXPERIENCE

Clspace GmbH

Apr 2025 – Sep 2025

Full-Stack Developer (Internship, Part-time)

Berlin, Germany

- Developed a React dashboard for **100+ users** to reserve **47+ items**, cutting booking time by **75%**.
- Built an **authenticated admin panel** for **3 café owners** to edit **200+ weekly reservations** and track analytics via a **Fast API + MongoDB**.
- Integrated automated email notifications via **EmailJS**, providing **real-time confirmations** and improving response rate by **45%**.

Zarand Steel Co. (ZISCO)

Feb 2023 – Aug 2023

Full-Stack Developer

Tehran, IR

- Engineered a **TypeScript + Node.js** pipeline processing **5K+ real-time sensor records**, cutting manual input by **45%**.
- Maintained **Node.js MS** with REST APIs and WebSocket streams, reducing latency by **35%** and supporting 500+ concurrent sessions.
- Optimized reusable **UI components** and **Redis caching**, improving reliability by **30%** across **3 production sites**.

Armeno Company

Apr 2021 – Jan 2023

Web Developer Intern

Tehran, IR

- Developed 10 backend API endpoints and **20+ SQL queries** for reliable data storage and retrieval.
- Implemented Python scripts for data cleaning and validation on datasets exceeding **50,000 records**, reducing input errors by **30%**.
- Documented system workflows and contributed to backend data pipeline design.

SKILLS

Programming Languages: TypeScript, JavaScript, Python, SQL

Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS

Backend & APIs: Node.js, Express.js, REST APIs, GraphQL, WebSockets, Authentication, FastAPI

Cloud & DevOps: AWS (Lambda, DynamoDB), Docker, CI/CD, GitHub Actions

Testing & Tools: Jest, Postman, Git, Figma

EDUCATION

SRH Berlin University of Applied Sciences

Oct 2023 – Sep 2025

Master of Engineering (M.Eng.) in Technology Management

Berlin, Germany

- Master Thesis:** Master Thesis: Web-based real-time Micro-grid monitoring platform with anomaly detection using data analysis and machine learning techniques.
- Relevant Courses:** Basic Programming, Data Analysis, Artificial Intelligence I & II, Software Development.
- Cohort Representative:** Facilitated communication between 50+ students and faculty, organizing 10+ collaborative meetings.

PROJECT

macOS Clone | [Website](#) | [SourceCode](#)

TypeScript | AllIntegration | GSAP | NodeJS

Portfolio with integrated AI assistant, built using React, TypeScript, Vite, and Node.js, interactive UI and real-time AI features.

T-shirt Customizer | [Website](#) | [SourceCode](#)

React.js | Three.js | Tailwind CSS

Developed a 3D product customization platform focused on performance and user-driven configuration workflows.

Real Estate | [Website](#) | [SourceCode](#)

Next.js | Axios | Tailwind CSS

Implemented API-driven real estate listings with filtering and client-side state management.

Wishlist Extension | [SourceCode](#)

JavaScript | HTML | CSS

Built a Chrome extension using chrome.storage API to save and organize browser tabs into categorized wishlists with descriptions.

CERTIFICATES

Docker Foundations Professional Certificate (Docker)

LinkedIn, 2024

React.js Essential Training

LinkedIn, 2024

Web Development with HTML, CSS, JavaScript (IBM)

Coursera, 2024

Design Computing 3D Modeling with Python (University of Michigan)

Coursera, 2023

LANGUAGES

- English: (Fluent) & German: (B2) (Limited working proficiency)
